A GRAND JURY UPON BOSSISM.

It is comparatively of recent date that an official inquisition dared to make political methods the subject of sharp criticism Within two or three years the Grand Juries of San Francisco, however, have not feared to lend their influence to the making of political bossism odious before the people. On Monday the last Grand Jury of that city filed an exceedingly lengthy report. Its main topic, outside of the usual test, therefore, with vicious bossism is very review of the domestic economy of county much one of organization, without which institutions, is the viciousness of bossism nd its baneful effect upon the commun-

Nevertheless the report is a very important one, and the arraignment of vicious boss influences by this high official body is evidence of the slow but steady drift of public sentiment. not only in San Francisco, but generally the chief weapon of the boss-or that throughout the land, in that direction and toward ultimate extinction, or at least safe in Ohio the cities of that State will ever control of the influences complained of.

There are San Franciscans who, themselves abhoring boss methods, yet cannot perceive any distinction between leaders or organizers and bosses. To them all captains of legions in contests for power and place are commissioned autocrats commanding hireling forces. If a revolution takes place that ousts autocratic bosses of a given class and seats victory upon the banners of opposition leadership, the doubting citizen expresses the opinion that it is, after all, the San Francisco Bulletin well says, it "but a change of bosses." This expression can have no other interpretation than of has come when a Grand Jury is apologizing for, or excuse of submission to found which soberly tells that a saloonthe former rule. That there is some force in this is not to be denied, but that it is becoming less and less tolerable is unquestionable. For all the signs of the age indicate that inactivity by citizens in the election at Jackson, Miss., for instance, the concerns of good government is growing

San Francisco is itself an example this truth. She revolted with violence i 1856 against infamous domination, and between the years 1858 and 1872, on at least six or seven occasions, and each time with greater ease her people broke away from all political parties, and by the action of independent citizens, irrespective of political faith, she drove out the moneychangers from her municipal temple, and reformed her systems from the bench down to the police department. Frequently, since, she has shown the capacity to recover the reins of government from the hands of bosses into which, by the quiescence and patience of the people, and the increase of the vicious elements, they had been permitted to pass.

The city of San Francisco, in common with several other cities, repeatedly demonstrated that those who despise bossism and venal political control are in the majority whenever they choose to assert themselves through organization, keeping the one prime object steadily and persistently in view, no matter behind what leadership or party the enemy may mask. It is upon such a line of action that municipal reform has so successfully moved in Philadelphia, and it is such persistence and vigilance and adhesion to

principle that the San Francisco Grand Jury have in view when it says: So long as tax-payers continue their needless party struggles over city affairs, they unwittingly serve the bosses, who merely hold the balance of power, but thereby control nearly every department, seriously embarrassing the few officials who struggle against this subtle influence and strenuously endeavor to be independent of it. Bossism, like the eucalyptus, sends its roots in every direction steeling successions. ends its roots in every direction, stealing sustenance to maintain its rapidly growing trunk, and the sooner it is cut down the easier it will be to dispose of those roots, and only the tax-

As the San Francisco Grand Jury puts it:

But the difficulty is, and the jury fully

By indifference affairs are permitted to drift back into the old channels. This isposition has been largely checked in Eastern cities and notably in Philadelphia, and in many New England and som Western municipalities, by a variety of rganizations, such at Town Improvement Associations, "Committees of One Hundred," Citizens' Municipal Reform Associations, and even by protesting political organizations, something like one existing in this city, though the efforts of the latter class are confined to party reforms. All hese means are of the order of disciplined organization upon the side of the shrewd and masterly bosses. This con-

Yesterday morning he says he wanted to use \$20, and presented his receipt to Mr. Holder and received that amount of money. Mr. Holder threw the receipt in the desk and Pearre went out, supposing that it would be all right. Last evening he returned for the balance of his money, and Mr. Holder claimed that he did not have any money there, or that he had drawn whatever he deposited. ABOUT VALISES.

At present there are more extreme novelties in our Valise stock than we usually carry, and the intending purchaser who cannot now be suited must indeed be very exacting. For instance, in the line of Tourists' Valises (the kind that are worn with a strap over the shoulder) we have a line of sizes made of aligator skin, highly polished, ranging in price from \$2 50 to \$5 50, according to size. There is another Valise made in the shape of a log cabin, opening in the top with a patent lock, making it very handy and convenient for packing closely. Prices, \$9, \$10 and \$11, according to size.

There is a club-shaped Valise, made out of genuine sealskin, color black, and mounting of brass.

A close imitation of the above, one indeed that is often sold for seal, is a valise made of grain leather. The coloring, finish and trimming are the same, but material of course different. These we have at \$6, \$7, \$8 and \$9.

There is a small-sized Hand Satchel, made of alligator, with brass mountings and a new style of lock, just large enough to hold a comb and brush and a few other necessary articles for a short trip. Prices, \$4 40, \$4 80, \$5 10 and \$6.

A Valise entirely new in material and design. It is made of macrame, and finished on the bottom and sides with alligator. Price, \$5 and \$6.

Other styles of Valises from 65 cents to \$21.

Not everyone knows that we have one of the iargest collections of Silver Plate in town, and sell it very carefully. What we have we know to perfection. There is such a thing as knowing.

WHEAT—An improvement at Liverpool gives the local market more tone in sympathy. Business, however, has not assumed any great proportions, simply because higher asking rates for freights offset the improvement in grain abroad. Shippers say they cannot see their way to come out more than even in paying \$1.361/4 % ctl for Standard Wheat, and are therefore not inclined to negotiate on a basis of \$1.371/4, which is the figure generally demanded for a suitable article. BARLEY-Considering all attendant circum

BarLEY—Considering all attendant circumstances, the Barley market holds up well. Holders understand that it sales of feed were pressed, the result would be a futher lowering or prices. As a consequence, the array of offerings is kept within moderation, while no opportunity is lost to trade, even if sight concessions be necessary to bring about the result. New brewing is finding some inquiry, being wanted to fill export orders. Chevalier is understood to have been receiving some attention from the shipping interest, and moderate transactions are reported as having been made in the country, to be forwarded at an early date. We quote as follows: No. 1 Feed, 77½@78¾c: common grades, 75c: Brewing, 85@9be for fair to choice; Chevalier, \$1 25 to \$1 30 \$ctl.

OATS—This article has been less in demand since new crop Barley put in appearance. Still the market shows steady front, with holders inclined to advance rather than lower asking rates. We quote as follows: Surprise, \$1 50 \$1 37½; No. 1, \$1 30@1 32½; lower grades, \$1 25 \$61 27½; Gray, \$1 20@1 25 \$ctl.

CORN—The demand on local account is light, and business is quite dull. Occasionally, outside inquiry gives some little animation to the market, but it does not last, as 25 or 50 tons satisfies such trade. We quote as follows: Small Yel-

SCROFULOUS SORES.

When six months old the left hand of our li

le grandchild began to swell, and had every ppearance of a large boil. We poulticed it, but if the no purpose. About five months after it became a running sore. Soon other sores formed, ie then had two of them on each hand, and as the care of him, his mother having died when he was a little more than a year old, of consumption (scroula, of course). He could walk a little, but could not get up if he fell down, and could not move when in bed, having no use of his hands. I immediately commenced with the CUTICUEA REMEDIES, using the CUTICUEA and CUTICUEA SOLP freely, and when he had taken one bottle of the CUTICUEA RESOLVENT his head was completely cured, and he was improved in every way. We were very much encouraged, and continued the use of the Kemedies for a year and a half. One sore after another healed, a bony matter forming in each one of these five deep ones just before healing, which would finally grow loose and were taken out; then they would heal rapidly. One of these ugly bone formations I preserved. After

taken out; then they would heal rapidly. One of these ugly bone formations I preserved. After taking a dozen and a half bottles he was completely cured, and is now, at the age of six years, a strong and healthy child. The scars on his hands must always remain. His hands are strong, though we once feared he would never be able to use them. All that physicians did for him did him no good. All who saw the child before using the Cuticura Remedies and see the child now consider it a wonderful cure. If the above facts are of any use to you, you are at liberty to use them.

Mrs. Dart's Triplets. President Cleveland's Prize for the three best babies at the Aurora County Fair, in 1887, was given to these triplets, Mollie, Ida, and Ray, children of Mrs. A. K. Dart, Hamburgh, N. Y. She writes: "Last August the little ones became very sick, and as I could get no other food that would agree with them, I commenced the use of Lactated Food. It helped them immediately, and they were soon as well as ever, and I consider it very largely due to the Food that they are now so well." Lactated Food is the best Food for bottle-fed babies. It keeps them well, and is better than medicine when they are sick. Three sizes: 25c., 50c., \$1.00. At druggists. Cabinet photo. of these triplets sent free to the mother of any baby born this year.
